- + **Simple** Options

= **Inground Quality with Choices**
but at **Affordable Prices**

It's *Simply*
an Easy Installation

a little inconvenience... a lot of rewards!

The fact is, your backyard will be a construction site. When planned correctly, the inconvenience is manageable and short-lived. The process begins by planning out the location of your pool. Minor excavation will be needed in the area where your new pool will be, and the retaining walls and bracing systems will be set in place. After the retaining walls are secure, the pool's bottom will be formed so it will be ready for the pool liner. Once the liner is in place and all of the final finish processes are completed, simply add options, decking, etc. to complete your pool's look.

Now, all that remains is a lifetime of fun and relaxation.

THE Funtastic Pool... *Simply* elegant and easy to install

Funtastic Pools are designed to be easily installed and easy to maintain. We offer four standard shapes in a variety of sizes to make your selection perfect for your family.

52 inches deep

Notice: Although in some photos of the pool in this brochure the No Diving signage may not be visible, such warning signage must be installed around the perimeter of the pool.

THE
Funtastic
POOL®

It's *Simply* a Reality

If there is a pool in your backyard, it's a guarantee your children will grow up at home and not over at the neighbors playing video games throughout the summer. A pool draws kids to where the fun is...not to mention the cool, blue water that awaits them! From the minute you make the decision to invest in a pool, your family will take an active role in enjoying it!

THE Funtastic Pool is Unparalleled in it's Strength

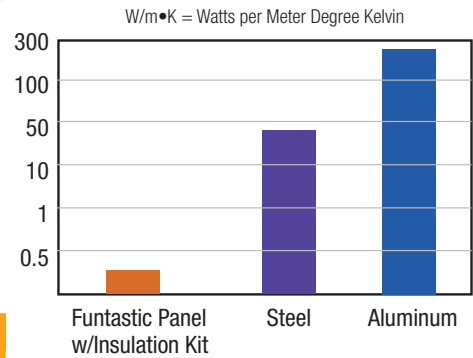

It's strong because it's made of quality american-made steel

...which features **Alpha Shield Protection**, the new standard in steel building materials and **SPERT Technology** (Self-Piercing Riveting Technology)

Funtastic Energy Efficient

Based upon Thermoconductivity (W/m•K) or the transfer of heat and cold, these Funtastic panels rank as the best insulators at a 0.3 W/m•K. Compare this with other materials used for paneling: Steel at 43 W/m•K and Aluminum at 250 W/m•K.

R-10 INSULATION FACTOR!

Safety 1st
Safety 2nd
Safety Always!

Water is everywhere - community pools, lakes, and rivers. What better way to "waterproof" your loved ones than by teaching them to swim! The lifelong benefits are immeasurable. Children who learn to swim are far less likely to become a tragic statistic from a water accident away from home.

With owning a pool also comes responsibility. There are many rules that must be followed around a pool. Protect yourself and your loved ones. Read and educate yourself with all literature that is available in the pool industry. Insist that your independent pool professional supply the industry publications that deal with pool safety, maintenance and the do's and don'ts around the pool. There are also many resources for information about pool safety on the Internet. We recommend contacting The Association of Pool & Spa Professionals. This national organization is the best resource for most swimming pool safety publications.
